LG | Business Solutions

LG BUSINESS PARTNERSHIP & INFRASTRUCTURE

Infrastructure in Europe

LG Electronics' European Air Solution department is committed to ensuring your business success. With 16 pan-European sales offices and academies, we seek to deliver on our promise of support, efficiency and proactivity throughout each stage of our business partnership.

Our highly competitive products are delivered through our dedicated European distribution centre to ensure a steady and reliable supply of inventory.

At our European Energy Lab, LG Business Solutions is developing a heat pump technology that is optimized for the varied European climates and weather patterns along with continuous product performance verification.

LG Europe B2B Regional Head Office

LG Business Solutions Europe is based in Eschborn, Germany, with regional offices located throughout Europe. LG Europe B2B Regional Head Office is a control tower for European B2B business dealing with a wide range of products, including heat pumps and air conditioners. LG Electronics has a strong global network.

About LG Business Solutions:
<http://www.lg.com/global/business/about-lg-business>

LG Heat Pump and Air Conditioning Academy

LG has set up 20 official heat pump and air conditioning academies in Europe, teaching much needed skills to thousands of current industry professionals including installers, consultants, designers, sales staff and service technicians. The academy program is designed to share expertise and educate these HVAC experts by providing a cutting-edge technical experience with the newest and most advanced technologies and equipment. Moreover, as LG's entire product range is installed on site, professionals can be trained in a realistic way that offers them the chance to experience the latest products first-hand.

European Distribution Center

LG's European Distribution Center is located in Tilburg, the Netherlands. Supplying products all over Europe, this distribution hub has contributed to smooth and rapid delivery, direct shipping for smaller orders and delivery tailored to air conditioners. Inventory efficiency of the hub is secured by the LG EU's established inventory pool.

THE EU BUILDING SECTOR

Buildings account for 40% of the total carbon emissions in Europe. The building stock that dates back to the 90s is three times less energy efficient than new construction built today.

OF EU ENERGY IS USED BY BUILDING SECTOR, MAKING IT THE SINGLE LARGEST ENERGY CONSUMER IN EUROPE

OF GREENHOUSE GAS EMISSIONS COME FROM BUILDINGS

LG OUR MISSION

- ① Create low-consuming or self-consuming innovations
- ② Build awareness and help people use energy more conservatively
- ③ Reimagine a building's usability, connectivity, convenience & health

RE-DESIGN

IMPROVE CIRCULARITY OF RAW MATERIALS

Minimize environmental impact with our eco-conscious air conditioning solutions. By reducing reliance on finite resources such as plastic, aluminum, and copper, LG's innovative approach embraces a circular economy supply chain. This not only lessens carbon emissions during pre-manufacturing but also ensures resource efficiency, particularly for energy-hungry materials. Discover the sustainability of LG air conditioners, where recycled materials play a pivotal role. We conduct thorough stability and quality tests to guarantee optimal performance, leading the way toward a more sustainable and efficient future.

RECYCLING OLD APPLIANCES

Many reusable resources are left in discarded products. Founded in 2001 through investment from LG, the Chilseo Recycling Center acts as a virtuous cycle of resources, from product design, use, and recovery, to disposal. Engineers collect old appliances from LG and other brands, then carefully take them apart. More than 40 kinds of renewable raw materials, including separated plastic, iron, and non-ferrous metals, are reborn into new LG products.

RE-PROGRAM

ACHIEVE 95% IN WASTE RECYCLING AT PRODUCTION SITES BY 2030

At LGE, we continuously invest in environmental facilities and improve our waste treatment processes with a view to being able to recycle 95% of waste generated at production sites around the world by 2030.

INNOVATE

REDUCE RELIANCE UPON HIGH GWP REFRIGERANT GASES

Refrigerant gases contribute to global warming even though their contribution is not the biggest. LG was the first manufacturer to launch an R32 monobloc air-to-water heat pump in 2018 and have also converted our full single split line up to R32 with 3 years lead time on the EU -driven planned ban in 2025. Also, LG is likely to put in place collection and recovery streams of refrigerant gases from end of life equipment at no extra cost for its customers.

CONSTANT PRODUCT EFFICIENCY IMPROVEMENTS

Electrically-driven heating and cooling equipment is LG's signature. What's more, we always aim at the highest energy ratings, generation after generation of product launching.

Reduce carbon emissions during use of 7 major products (baseline year 2020)

FIRST HOME APPLIANCES LIGHTHOUSE FACTORY

In March 2022, Changwon LG Smart Park was named the first 'lighthouse factory' by the World Economic Forum (WEF). The WEF "Lighthouse" facilities implement Fourth Industrial Revolution technologies, such as the Internet of Things, big data, artificial intelligence and robots, into manufacturing and supply chain operations to deliver a wide range of benefits, from increased production efficiency to enhanced environmental sustainability. LG plans to apply the innovative, smart production technologies pioneered at LG Smart Park to a total of 26 LG production facilities in 13 countries, accelerating the digital transformation of its global manufacturing network by 2025.

EDUCATE

LIFE CYCLE ANALYSIS

The Air Solution Division has assessed 4 product families, as regards their total life cycle impact, according to the French PEP certification scheme: it provides product greenhouse gas emissions from production, transport, use and end of life phases, over a period of 22 years.

Efficiency comparisons between THERMA V & differing technologies

CERTIFICATIONS

LG Electronics is listed in the:

- DJSI World for 9 consecutive years
- 2020 Global Sustainability Leadership top 100, announced by Privileged United Nations Sustainability Development Goals (UNSDGs)
- 6th place in the top 100 World Sustainable Management Companies by Wall Street Journal
- ECOVADIS Platinum certified in 2021 & 2023

HEAT PUMP TECHNOLOGY

LG Electronics Leads the Way in Heat Pump Technology

As a leading HVAC supplier, LG's heating product portfolio comprises a wide range of highly energy efficient renewable energy systems, providing the right heating solution for any type of requirements and/or buildings.

What is an Air-to-Water Heat Pump System?

Modern Technology to Replace Conventional Boilers

Historically, conventional heating systems have used either oil or gas or have represented direct electric heaters. In such conventional heating systems, environmental aspects such as the pollution produced by fossil fuel use have been overlooked. Over the last years, the interest in these environmentally friendly devices has been increasing and in order to respond to the growing demand for eco-conscious devices, LG has further developed its heat pump technology to produce more efficient, environmentally friendly products.

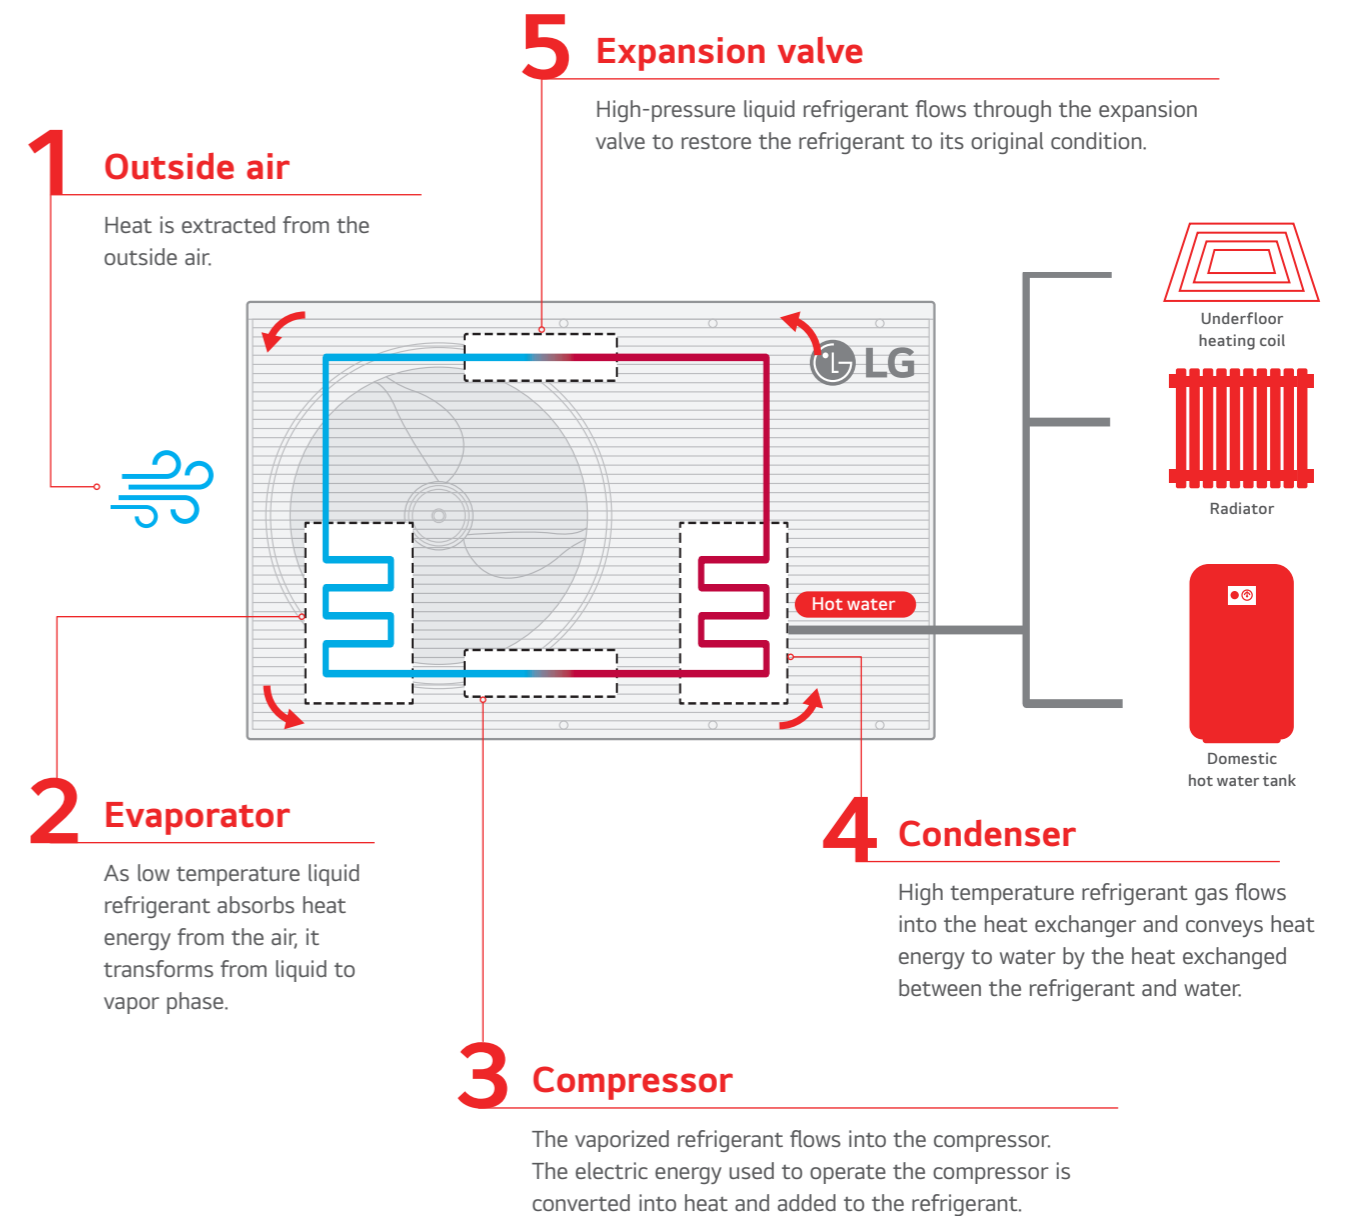

Modern Technology for Renewable Energy

The term "Heat Pump" refers to a technique that pumps heat from renewable energy sources, like the air, ground and water. A heat pump device transforms this energy into a usable heat source via the refrigerant cycle. With THERMA V heat pump technology about 75% of the energy needed to provide heating and hot water comes from a natural air source.¹⁾

¹⁾ The efficiency ratio is to help general understanding and is based on the Seasonal Coefficient of Performance (SCOP) of THERMA V R290 Monobloc under Low Temperature & Average Climate conditions, which is higher than 5. The actual efficiency may vary with water and outside temperatures.

How do Air-to-Water Heat Pumps Work?

REGULATIONS & CERTIFICATIONS

Energy Label

Energy labels

The EU energy label has been a key driver for helping consumers choose products which are more energy efficient. At the same time, it also encourages manufacturers to drive innovation by using more energy efficient technologies. The energy label was recognized by 93% of consumers and 79% considered it when buying energy efficient products, according to the special eurobarometer 492 carried out in the 28 EU member states during 2019.

Starting from 2013, the regulations apply to heat pumps, as well as to water heaters since 2015.

As of September 26th, 2019, the energy efficiency scale for seasonal space heating ranges from A+++ to D, with A+++ being the most efficient. The water heating energy efficiency scale for the declared load profile for combination heat pumps ranges from A+ to F, with A+ being the most efficient.

Information on the energy label

The energy labels provide minimum necessary information such as: manufacturer's name, manufacturer's model name, seasonal space heating energy efficiency class under average climate condition from A+++ to D in medium/low temperature applications (55°C/35°C), rated heat output under average, colder and warmer climate conditions in medium/low temperature applications (55°C/35°C), European map displaying the three temperature zones, the sound power level indoors and/or outdoors. In addition, just for combination heat pumps, the energy label also includes Water heating energy efficiency class under average climate condition from A+ to F at declared load profile, while the seasonal space heating energy efficiency class and rated heat output are indicated only for the medium temperature application (55°C).

Heat pump space heaters

- 1 Manufacturer's name or trade mark
- 2 Manufacturer's model name
- 3 Space heating function
- 4 Seasonal space heating energy efficiency class under average climate condition from A+++ to D in medium/low temperature applications (55°C/35°C)
- 5 Rated heat output (kW) under average, colder and warmer climate conditions in medium/low temperature applications (55°C/35°C)
- 6 Operating noise for indoor and outdoor
- 7 European map displaying the three temperature zones

* This energy label may differ depending on local regulations (for example in the UK).

Heat pump combination heaters

- 1 Manufacturer's name or trade mark
- 2 Manufacturer's model name
- 3 Space heating function
- 4 Seasonal space heating energy efficiency class under average climate conditions from A+++ to D in medium temperature applications (55°C)
- 5 Water heating energy efficiency class under average climate conditions from A+ to F
- 6 Rated heat output (kW) under average, colder and warmer climate conditions in medium temperature application (55°C)
- 7 Operating noise for indoor and outdoor
- 8 European map displaying the three temperature zones

* This energy label may differ depending on local regulations (for example in the UK).

Nearly Zero Energy Building (nZEB)

Nearly Zero Energy Building

Nearly Zero-Energy Building (nZEB) means a building that has a very high energy performance, while the nearly zero or very low amount of energy required should be covered to a very significant extent by energy from renewable sources, including energy from renewable sources produced on-site or nearby. The Energy Performance of Buildings Directive (EPBD) requires that EU countries ensure that all new buildings are nearly zero-energy by the end of 2020, while all new public buildings had to be nearly zero-energy after 31 December 2018.

As concrete numeric thresholds or ranges are not defined in the EPBD, each EU member state defines their Nearly Zero-Energy Buildings (nZEB) in a flexible way, taking into account their country-specific climate conditions, primary energy factors, calculation methodologies, building traditions and current ambitions.

How LG THERMA V supports to Nearly Zero Energy Buildings (nZEB)

In general, consultants use software programs to evaluate nZEB satisfaction of a new building. LG has been registering THERMA V products in their database so that our THERMA V products can be used directly in these software programs such as BENG in Netherlands, SAP in UK and RE2020 in France.

LG THERMA V energy labels | Energy labels for each LG THERMA V model can be found on the websites below.

REGULATIONS & CERTIFICATIONS

Certifications

All heat pumps and water heaters in the European market are continuously tested by various certification schemes. These are usually the basis for qualifying for subsidy programs in each country.

Keymark

<https://keymark.eu/en/products/heatpumps/certified-products>

[Browse now](#)

The heat pump Keymark is a voluntary, independent European certification mark (ISO type 5 certification) for all heat pumps, combination heat pumps and hot water heaters (as covered by ecodesign, EU regulation 813/2013 and 814/2013). It is based on independent, third party testing and demonstrates compliance with product requirements as set in the heat pump Keymark scheme rules and with efficiency requirements as set by ecodesign lot 1 and lot 2.

The heat pump Keymark scheme is owned by the European committee for standardization (CEN).

The certificates are granted by independent certification bodies to products fulfilling all requirements of the scheme. LG THERMA V products are certified with the heat pump Keymark. Please, refer to the web page above for details.

Eurovent

<https://www.eurovent-certification.com/en/>

[Browse now](#)

Established in 1993, Eurovent certita certification is recognized as a world leader in third-party product performance certification in the heating, ventilation, air conditioning and refrigeration fields. Its major certification brand 'Eurovent Certified Performance' has become over the years a major European certification. Today over 67% of HVAC-R products sold in Europe hold this certification. LG THERMA V products are certified with Eurovent. Please, refer to the web page above for details.

MCS

<https://mcs-certified.com/product-directory/>

[Browse now](#)

MCS certification is a mark of quality and demonstrates compliance to industry standards. It is supported by the department for business, energy & industrial strategy of the UK. In particular, MCS certification demonstrates the quality and reliability of products in the renewable technology sector and it ensures that products are compliant with the UK regulations.

LG THERMA V products are certified with MCS. Please, refer to the web page above for details.

EHPA

<https://www.ehpa.org/quality/quality-label/>

[Browse now](#)

The EHPA quality label is a label that shows the end-consumer a quality heat pump unit or model range on the market. The heat pumps that receive the label need to undergo tests according to the international standard EN14511 and EN16147. These tests are executed by EN17025 accredited test centres.

LG THERMA V products are certified with the EHPA quality label for Austria, Germany and Switzerland. Please, refer to the web page above for details.

THERMA V™ INTRODUCTION

THE SUSTAINABLE CHOICE

RELIABLE
FUTURE-PROOF
ECO-RESPONSIBLE

THERMA V™

Today's informed consumer will consider multiple factors when choosing a heating solution, like an Air-to-Water Heat Pump (AWHP or ASHP) to include user-friendliness, reliability and regulation-compliance. Shifting regulations year after year exceedingly impact the European customers' choice of heating products.

With refrigerant regulations changing around the world, it's time to move to a more eco-conscious solution. THERMA V R290 Monobloc uses natural R290 refrigerant which has a lower tonne of CO2 equivalent index than other gases such as R32. Possible carbon emission from refrigerants is reduced by 99.7% compared to previous R32 Monobloc. The R290 can be vented directly into the atmosphere without any impact on the climate because it's eco-conscious refrigerant with nearly zero carbon emissions.

LG Electronics' THERMA V line-up fulfills both European regulations as well as customer needs.

LG's Advanced Heating Technology

The LG THERMA V Air-to-Water Heat Pump system boasts an advanced heating technology that can minimize energy consumption more than any other solution in the market. In addition, it has been specially designed to provide a valuable living space and domestic hot water supply to both new build and renovated homes.

THERMA V™

Space heating

The wide span THERMA V systems with high efficiency can cover heating loads of various types of houses.

Domestic hot water

As the hot water efficiency becomes more and more important, THERMA V can provide an optimized solution for this.

Space cooling

THERMA V is a single device that can also provide a cooling solution besides the heating and hot water provided by boilers.

High Efficiency and Low CO₂ Emission

Energy & cost saving

CO₂ emission

Conventional boiler

LG THERMA V

Conventional boiler

LG THERMA V

Benefits of LG THERMA V

For installers and service providers

- Time savings with features for quicker installation and commissioning
- Less manpower for handling with the compact size and light weight
- Less service visit with high reliability and durable equipment
- Intuitive controller interface for all LG products, requiring less training
- Remote control, monitoring and diagnosis to avoid unnecessary site visits
- Clip connections for quick maintenance and no need for special tools

For consultants and designers

- Variety of software to support selection and designing THERMA V
- Multiple solutions with space heating, cooling and DHW supply
- Wide leaving water temperature - compatible with various heat emitters
- Valuable space savings with the small footprint
- Excellent heating performance even at low ambient temperature
- Optimal system interoperability - open modbus with 3rd party controller
- Adapts operation to ESS battery output, maximizing self-consumption of locally produced PV energy

For homeowners

- Energy saving by utilizing renewable energy and high efficiency equipment
- Multiple solutions with space heating, cooling and DHW supply
- Economic support through domestic renewable heat incentive programs
- Investment cost savings thanks to the compatibility with existing heating system like radiator, boiler, etc.
- Valuable space savings with the small footprint
- No disturbing caused to neighbors with low noise
- Low repair cost and high reliability with durable equipment
- Convenient control by user-friendly remote controller
- Remote connectivity for control and monitoring via LG ThinQ

LINE-UP INTRODUCTION

R290 Monobloc

The new R290 Monobloc is a super-quiet, future-conscious heat pump that uses the R290 refrigerant which has lower GWP of only three. Refined grey design allows it to seamlessly harmonize with a diverse range of home and building exteriors and thanks to its low noise level, you don't have to worry about finding an installation location that won't disturb your neighbors. The LG THERMA V R290 Monobloc is available in three different combinations (Control Unit, Hydro Unit or Combi Unit¹⁾) depending on the customers' needs. By adopting a high-efficiency compressor leveraging injection technology, R290 Monobloc can deliver a leaving water temperature of up to 75 degrees Celsius all year round. Thus, this unit is suitable for renovation house since such high temperature of water is compatible with previously installed radiator systems. Moreover, thanks to the LG's renowned compressor technology, the THERMA V R290 Monobloc is able to maintain a comfortably warm indoor temperature even when it's a freezing-cold negative 28 degrees Celsius outside.

Line-up	Capacity (kW)	4.0	5.5	6.0	7.0	9.0	12.0	14.0	16.0
R290 Monobloc	1 Ø 230 V						•	•	•
	3 Ø 400 V					•	•	•	•

¹⁾ The Combi Unit are under development, those will be launched within this year.
* The power supply is shown based on the outdoor unit.

R32 Monobloc S

The THERMA V R32 Monobloc S is the 2nd generation of LG's R32 Monobloc series. As implied by "silence" and "supreme," it boasts reduced noise level and best performance in the THERMA V Series. Combining the indoor and outdoor as one module, it's also connected by only water piping eliminating the need for refrigerant piping. Furthermore, hydronic components like the plate heat exchanger, expansion tank, water pump, flow sensor, pressure sensor, air vent valves, and safety valve are conveniently situated inside the unit. The R32 Monobloc S provides excellent heating performance, especially at low ambient temperature, while producing lower carbon emissions with R32.

R32 Monobloc S	1 Ø 230 V		•		•	•	•	•	•
	3 Ø 400 V					•	•	•	•

R32 Hydrosplit Hydro Unit

The LG THERMA V Hydrosplit series separates the indoor unit (IDU) and outdoor unit (ODU), connecting them via water pipes. The unit's heat exchanger is located within the ODU, reducing the risk of indoor refrigerant leakage. THERMA V R32 Hydrosplit Hydro Box is a solution providing space heating, cooling and DHW supply with high installation flexibility thanks to the characteristic of being a wall mounted type. Since the indoor unit is installed on the wall rather than on the floor, space is not wasted, and the light weight enables quick installation. Also, it has good maintainability because the indoor unit is located indoors, for example in a machine room.

LINE-UP INTRODUCTION

R32 Hydrosplit Combi Unit

The LG THERMA V Hydrosplit series separates the indoor unit (IDU) and outdoor unit (ODU), connecting them via water pipes. The unit's heat exchanger is located within the ODU, reducing the risk of indoor refrigerant leakage. THERMA V R32 Hydrosplit Combi Unit combines an indoor unit, a water tank and complex piping into a single, space-saving solution that is able to provide space heating, cooling and DHW supply. Relatively compact and lightweight, the innovative all-in-one is easy to install and operate, and boasts the outstanding reliability and efficiency. Since there is no need to install a separate domestic hot water tank for hot water supply, space is not wasted, and the concept with all-in-one enables quick installation.

R32 Split Combi Unit

The LG THERMA V R32 Split Combi Unit is a domestic hot water supply, space heating and cooling solution that conveniently combines an indoor hot water tank with a separate outdoor unit. THERMA V R32 Split Combi Unit is the perfect space-saving solution for residential applications because hydronic components like the Domestic Hot Water (DHW) and buffer tanks, which are typically installed separately, are fully integrated. Also, freezing will not compromise this unit regardless of outdoor ambient temperatures due to the split nature. The outdoor unit is on offer in 4/6 kW and 5/7/9 kW capacity range. R32 Split 4/6 kW model is suitable for new build houses that are well insulated and require a small heating load, while R32 Split 5/7/9 kW model is adapted for both new build and renovation projects.

R32 Split Combi Unit	1 Ø 230 V	●	●	●	●	●			
	3 Ø 400 V								

* The power supply is shown based on the outdoor unit.

R32 Split Hydro Unit

The LG THERMA V R32 Split Hydro Unit is a hydro type system consisting of an indoor unit and an outdoor unit. The two units are connected by refrigerant piping only, thus hydronic components such as plate heat exchanger, expansion tank and water pump are located within the indoor unit. Due to the split nature, freezing will not compromise this unit regardless of outdoor ambient temperatures. The outdoor unit is on offer in 4/6 kW and 5/7/9 kW capacity range. R32 Split 4/6 kW model is suitable for new build houses that are well insulated and require a small heating load, while R32 Split 5/7/9 kW model is adapted for both new build and renovation projects.

R410A Split Hydro Unit

The LG THERMA V R410A Split Hydro Unit is a hydro type system consisting of an indoor unit and an outdoor unit. The two units are connected by refrigerant piping only, thus hydronic components such as the plate heat exchanger, expansion tank and water pump are located within the indoor unit. Due to the split nature, freezing will not compromise this unit regardless of outdoor ambient temperatures. LG's THERMA V R410A Split Hydro Unit is designed for the benefit of users and installers who want to apply a heating solution to a large capacity building or applications subject to colder climate conditions. It has a maximized energy efficiency of A++ in the mid-temperature ranges, which results in reduced operating costs.

What is the THERMA V Hot Water Heat Pump?

As interest in eco-conscious energy solutions grows, there is an increasing demand to replace existing electric and gas water heaters with heat pump water heaters utilizing heat pump technology. THERMA V Hot Water Heat Pump, the brand name for LG heat pump water heaters, gets 75% of its energy from outside air. This renewable energy source uses two heat exchangers, a condenser and an evaporator to produce domestic hot water.

LG inverter technology

LG inverter technology can be found in many of LG's renowned devices, from refrigerators and washing machines to our air conditioner line-up. This technology allows the inverter compressor to achieve superior energy efficiency, hot water heating performance and comfort compared to compressors with on-off capabilities which is rare for monobloc heat pump water heaters.

Power consumption change

DUAL Inverter Compressor

- The top class efficiency
- Hot water performance ↑
- Low noise operation
- Various operation mode

Smart control

- Wi-Fi embedded
- Smart diagnosis
- Easy check & monitoring

LG design identity

- Premium interior design

Hygiene & durable tank

- Anti-legionella
- Impressed current titanium anode
- 10 year warranty

PRE-SALES / ENGINEERING TOOLS

Pre-sales/Engineering Tools

LG provides a variety of software to support THERMA V for all customers including designers, installers, and end users.

1. LATS THERMA V

[Browse now](#)

LATS THERMA V is a web based simulation tool that enables to choose the optimal THERMA V model from various capacity range and simulates its energy cost comparing to other heating solutions. Furthermore, customer is easily able to simulate payback compared to a conventional system such as a gas boiler, electric boiler by using LATS THERMA V.

There are 3 types project in LATS THERMA V WEB.

1. Model Selection : Select suitable model based on the design conditions you input.

2. Diagram : Generate piping / wiring diagrams in DWG format based on the design conditions and other selected applications.

3. Sound Simulation : Provide noise simulation results according to distance from house.

2. LG Energy Lab

[Browse now](#)

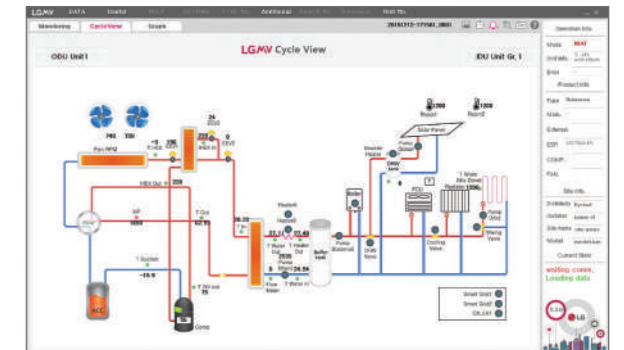

LG Energy Lab online is a web version tool that can print energy labels. It is easy to use because it is composed of a user-friendly UI, and provides additional functions such as contact function and project management function.

3. LGMV

LGMV is a useful engineering tool that monitors THERMA V's real-time refrigerant and water cycle. It assists installers with effective and efficient start-up and commissioning after the THERMA V installation. LGMV enables service/field engineers to detect the errors and troubleshooting for fast and reliable problem solving.

* LGMV is available on the LG partner portal.

4. LG THERMA V Selector

The LG THERMA V Selector is a mobile application for designers, installers and end users, which provides various real-life simulations. An energy simulation can quickly indicate energy consumption and cost as well as CO₂ emission values that can be vastly reduced from conventional heating systems using minimal input values.

With both model selection and energy simulation tools, quick and accurate selection is made possible with detailed input values such as desired system configuration, required heating and Domestic Hot Water (DHW) load, which will calculate payback, result in a faster energy simulation and generate cost comparisons. Sound level can also be calculated through simulations based on the installation environment.

ThinQ SEAMLESS CONNECTIVITY

Smart Control, Smarter Life

LG ThinQ, a smart phone app, allows users to monitor and manage compatible LG products remotely, which means they can set the temperature and regulate the use of their THERMA V anytime and anywhere.

In most EU countries, LG ThinQ technology also works with Google Assistant, letting users control their THERMA V with voice commands.

Mandatory accessory: PWFMD200 (LG Wi-Fi Modem) / PWYREW000 (10 m extension connect cable in between THERMA V indoor and LG Wi-Fi Modem) could be required depending on installation conditions.

- * Search "LG ThinQ" on Google market or App store, then download the app.
- * Google assistant voice control may be restricted in use and language in some countries.
- * Google and Google Home are trademarks of Google LLC.
- * Voice-enabled smart speaker device is not included.

How to install the LG ThinQ app

Search and install for the LG ThinQ application from the Google Play or Apple App Store on a smart phone.

How to connect THERMA V to the LG ThinQ app

In the video below, see how to install Wi-Fi modem and connect THERMA V and ThinQ.

Watch now

Connect and control from anywhere, anytime

LG ThinQ allows end users to easily control their heating system in away they have never done before. Let them experience smart control of THERMA V with just the tap of a button. Even when outside, they can operate the THERMA V remotely.

Simple control with voice assistant

Tell THERMA V exactly what is needed. Say, "Turn on/off the THERMA V" and the AI speaker will listen and turn on/off the THERMA V.

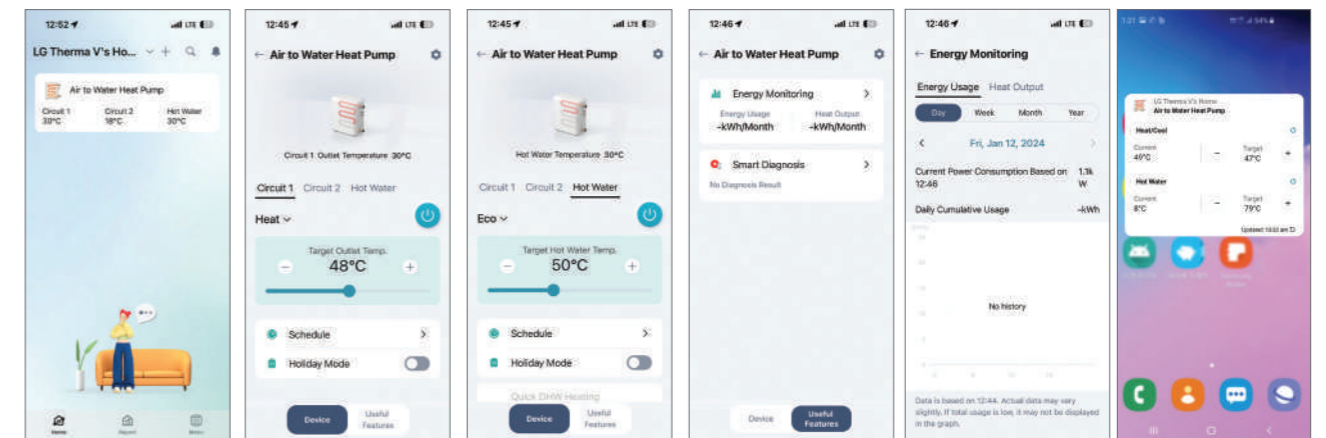

Efficient energy monitoring

The LG ThinQ app continuously monitors THERMA V. Whether it's everyday maintenance or something else, the app allows you to easily monitor energy usage.

ThinQ mobile app

This image is intended to help you understand, and there may be some differences in actual use. * Control via widgets is only possible with the Android app.

LG BECON CLOUD SERVICE

for THERMA V™

What is LG BECON Cloud Service?

LG BECON cloud service is a cloud-based service that remotely monitors a customer's heating system via PC, tablet or mobile anytime, anywhere. The operation status of the heat pump can be monitored at a glance as well as the past operation history. In the event of an issue, the cause can be identified in advance and the repair can be completed during a one-time visit. For more details and service contract, please contact your LG regional service contact.

* THERMA V, excluding R290 Monobloc, requires PI485 G/W installation between the Cloud G/W and the outdoor unit.

Target Customer and Benefits

Service partners / Installers

✓ Save time and cost

- One time visit with right parts
- No need pre-visit for diagnosis

✓ Quality of service

- Better service to end users with accurate diagnosis and fast repair

✓ Increased business opportunity

- Combine product + service offer
- Make more installation / repairs

End-users

✓ Enjoy peace of mind

- Be serviced at once or faster
- Be confident that immediate and quality of service will be provided in case of an error

✓ Less constraints

- No need to be at home for first diagnosis
- Monitor the operation status and control the system remotely

Key Features

Management at a glance

- Monitoring status of customers
- Interactive map view or list view

Energy monitoring

- Providing warning if energy usage is excessively high
- Display estimated power consumption by self-calculation

Monitoring with visualized schematic

- Examining the operating state of the heat pump
- Schematic view or table view
- Cycle monitoring, sensor and actuator monitoring
- Current status and historical data

Operation and error history

- Providing operation data and error history to quickly identify the issue
- Operation history, error history, setting history, etc

Remote control via cloud

- Preventing unnecessary site visit caused by simple operation mistake
- Operation mode (heating / cooling / DHW), target temperature
- Emergency operation, low noise operation, quick DHW operation

Error notification by e-mail

- Providing an e-mail notification automatically when an error occurs
- Possible to identify immediately and take a fast action

LG BECON CLOUD SERVICE

for THERMA V™

Why LG BECON cloud Service?

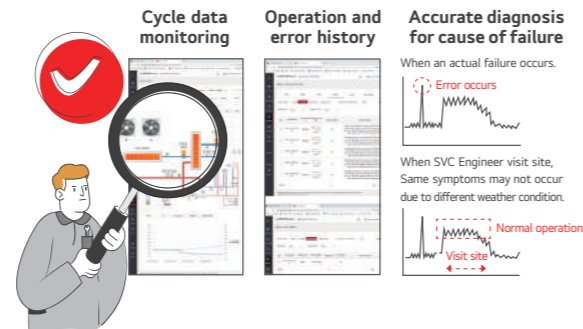

Quick service response time

Saving time and cost thanks to remote diagnosis of operation cycle without access to product.

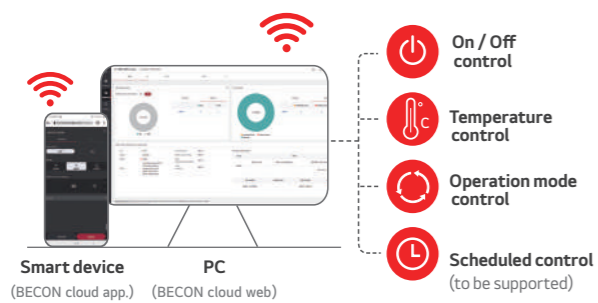

Accurate diagnosis

Accurate diagnosis for cause of failure can be done by utilizing the error code and cycle data when an actual failure occurs.

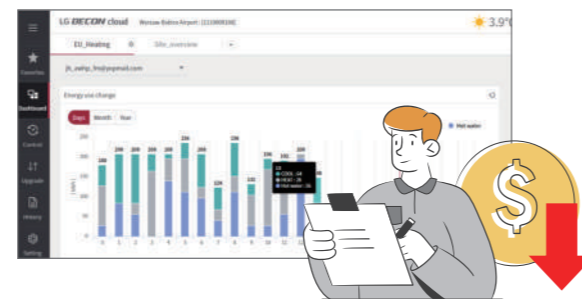

Remote device control

With single account, maintenance service provider (or installer) can control their customer's sites remotely. As a result, site visit is not needed for minor issues, such as adjusting temperature or mode.

Energy monitoring

Power consumption based on self-calculation is recorded and displayed. Maintenance service provider (or installer) can provide warning if energy usage is excessively high.

Error notification by e-mail

Providing an e-mail notification automatically when an error occurs, making it possible for maintenance service provider (or installer) to immediately identify and quickly react.

ThinQ for end-users

Without purchasing additional Wi-Fi Modem, end-users can control LG THERMA V via using smart internet devices.

Requirements

Compatible THERMA V ¹⁾	Required accessory	Network router
R290 Monobloc R32 Monobloc S R32 Split Hydro Unit R32 Split Combi Unit R32 Hydrosplit Hydro Unit	Cloud gateway (PWFMD200) PI485 gateway (PP485A00T) ¹⁾	Wireless or wired LAN
LG BECON cloud service contract	Supported device / software	Supported language ²⁾
Authority (ID and PW) to use LG platform (LG BECON cloud service)	PC, Tablet, Mobile PC or Mobile web browser, Mobile app. (Android / iOS)	English, Spanish, Italian, German, Polish, Greek

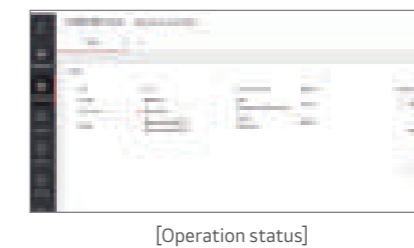

1) In the case of R290 Monobloc, PI485 G/W is built-in, so there is no need to purchase it separately.
2) More languages will be supported sequentially. The schedule for service availability may vary by country.

LG SMART HOME ENERGY PACKAGE

Power your home the smart way and save the energy bill

Your connected energy solution at a glance. The LG smart home energy package consists of LG's Energy Storage System (ESS) and the Air-to-Water Heat Pump (AWHP or ASHP), a system that's been expertly designed with compatibility in mind. With LG, you are able to minimize the energy cost and one step closer to the ultimate smart home.

THERMA V™ R290 Monobloc

A Heat Pump
for a Sustainable
Future

What is R290 Monobloc

The new R290 Monobloc is a super-quiet, future-conscious heat pump that uses the R290 refrigerant which has lower GWP of only three.

Refined grey design allows it to seamlessly harmonize with a diverse range of home and building exteriors and thanks to its low noise level, you don't have to worry about finding an installation location that won't disturb your neighbors.

The LG THERMA V R290 Monobloc is available in three different combinations (Control Unit, Hydro Unit or Combi Unit*) depending on the customers' needs.

* The Combi Unit are under development, those will be launched within this year.

Product Range

Phase	Capacity (kW)	Indoor Unit		Outdoor Unit
1 Ø	12	HN1616HC NKO	PHCSO	HM121HF UB60
	14			HM141HF UB60
	16			HM161HF UB60
3 Ø	9	HN1639HC NKO	PHCSO	HM093HFX UB60
	12			HM123HF UB60
	14			HM143HF UB60
	16			HM163HF UB60

Key Features

- Capacity range from 9 to 16 kW for renovation and large new builds
- Natural refrigerant R290 with low GWP (3)
- Refined gray design that adapts to various surroundings
- One of the quietest models on the market (49 dB(A) for 12 kW models)
- Maximum flow temperature up to 75°C
- Operation range down to -28°C
- Customized combinations of Control Unit, Hydro Unit, and Combi Unit

Excellent performance & efficiency

- R290: Natural refrigerant with GWP 3
- Adaptive Injection
- Wide operation range
- Quiet operation
- Black Fin heat exchanger
- Solar thermal
- Energy state
- Modbus connectivity

User convenience

- harmonic design with surroundings
- Intuitive interface
- LG ThinQ
- 2nd circuit
- Various control options
- Seasonal auto mode
- 3rd party boiler
- Energy monitoring
- DHW recirculation
- Low noise mode
- Advanced pump control options
- 2 remote control

Easy installation & maintenance

- Monobloc concept
- all-in-one
- LG BECON cloud
- 2-way water piping
- Clip connection

New Design

European design

- Refined gray design with wavy grille

High reliability

Anti-icing and Deicing technologies for R290 Monobloc

- 1 Defrost operation by dual EEVs & Cycle
- 2 Corrugated fin
- 3 Base pan heating (heater)
- 4 Elimination of side panel and rear grille
- 5 Frost-free for bottom pass of heat exchanger
- 6 Increased quantity for drain holes

High Efficiency Operation

Exceptional efficiency

Annual energy cost simulation

* This simulation result may differ from actual values due to assumptions.
 * Annual energy costs are calculated based on national gas and electricity prices as of June 2023 and may differ from the actual cost paid by customers depending on energy price changes and individual energy use patterns.
 For conventional heat pumps and gas boilers, energy consumption matches LG THERMA V R290 Monobloc 16 kW's heating demand. Specific assumptions include:
 1) considered only space heating for all system (DHW operation is not considered)
 2) average climate, low temperature application (35°C).
 3) SCOP 2.7 to account for a 10-year-old heat pump's performance degradation.
 4) 90% efficiency with a condensing boiler.

Extremely Quiet Operation

Heats home in hushed tones

R290 Monobloc	9 kW & 12 kW	14 kW	16 kW
Sound power level ¹⁾ (heating / rated)	49	51	52
Sound power level ¹⁾ (heating / low noise mode)	48	50	51

1) Sound power level is measured in accordance with EN 12102-1 and ISO 9614.

Ensuring regulatory compliance across all EU markets

Customers can have peace of mind with no risk of complaints and no additional costs for acoustic enclosures.

Improved Operational Stability

Freezing outside, but toasty inside

The R290 Monobloc can function in external temperatures as low as -28°C. Plus, customers can retain their existing radiators as the system can generate a water flow of up to 75°C, offering a cost-saving advantage.

Freedom of Integration

Customized combinations to meet diverse needs

Since THERMA V R290 Monobloc has hydro components integrated into the outdoor unit, it can be combined with various indoor units to implement applications tailored to customer needs.

Outdoor unit	Indoor unit type	
		Control Unit • Stand-alone concept • Easy integration with 3 rd party equipment
		Hydro Unit • Back-up heater & expansion tank integrated inside the Hydro Unit
		Combi Unit* • DHW tank, electric heater, expansion tank integrated inside the Combi Unit • 200 l stainless steel tank

* The Combi Unit are under development, those will be launched within this year.

Convenience

Easy installation

The two-way piping connection method not only grants greater installation flexibility but also offers distinct advantages when it comes to concealing underground piping for both aesthetic and frost protection purposes.

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 65 - 80°C Operating is available only when the booster heater is operating.

No.	Part name	Description
1	Leaving water pipe (heat load)	Male PT 1" according to ISO 7-1 (tapered pipe threads)
2	Entering water pipe (heat load)	Male PT 1" according to ISO 7-1 (tapered pipe threads)
3	Leaving water pipe (ODU)	Male PT 1" according to ISO 7-1 (tapered pipe threads)
4	Entering water pipe (ODU)	Male PT 1" according to ISO 7-1 (tapered pipe threads)
5	Control box	PCB and terminal blocks
6	Expansion tank	Absorbing volume change of heated water
7	Air vent	Air purging when charging water
8	Backup heater	Capacity: 1 Ø 6kW, 3 Ø 9kW
9	Terminal switch	Cut-off power input to backup heater at 90°C (manual return 55°C)

THERMA V™ R290

R290 MONOBLOC CONTROL UNIT

Outdoor unit

HM093HFX UB60
 HM121HF UB60 / HM123HF UB60
 HM141HF UB60 / HM143HF UB60
 HM161HF UB60 / HM163HF UB60

Indoor unit

PHCS0

Key features

- Stand-alone concept
- Light weight and compact size fits in small spaces
- Simple installation by minimizing piping and wiring work
- Easy integration with 3rd party equipment because of less cabling

Indoor Units		Unit	PHCS0
Operation range (leaving water temperature)	Heating (Min. - Max.)	°C	15 - 75
	Cooling (Min. - Max.)	°C	5 - 27
	DHW (Min. - Max.)	°C	15 - 80
Dimension	H x W x D	mm	490 x 420 x 141
Weight	Empty	kg	6.7
Exterior	Color / RAL code	-	Essence white / RAL 9003
Power supply	Voltage, phase, frequency	V, Ø, Hz	220-240, 1, 50
	Recommended circuit breaker	A	10

THERMA V™ R290

R290 MONOBLOC COMBI UNIT

PRELIMINARY INTRODUCTION

Outdoor unit

HM093HFX UB60
 HM121HF UB60 / HM123HF UB60
 HM141HF UB60 / HM143HF UB60
 HM161HF UB60 / HM163HF UB60

Indoor unit

HN1616HY NK0
 HN1636HY NK0

Key features

- All-in-one Combi Unit with integrated hot water cylinder
- Saves space in the technical room with a small footprint
- Installation time reduced with pre-installed components
- Harmonized with other household appliances for a cohesive exterior

Indoor Units		Unit	HN1616HY NK0 HN1636HY NK0
Operation range (leaving water temperature)	Heating (Min. - Max.)	°C	15 - 75
	Cooling (Min. - Max.)	°C	5 - 27
	DHW (Min. - Max.)	°C	15 - 80
Domestic hot water tank	Volume	ℓ	200
	Tank material	-	Duplex stainless steel
	Standby losses	W	60
Expansion vessel (heating circuit)	Volume	ℓ	8
Electric heater	Capacity combination	kW	1 Ø: 3.0, 6.0 / 3 Ø: 9.0
	Power supply	V, Ø, Hz	220-240, 1, 50 / 380-415, 3, 50
Piping connections (water)	Inlet / outlet diameter for connection to outdoor unit	inch	Female G1" according to ISO228-1 (parallel pipe threads)
	Inlet / outlet diameter for space heating	inch	
	Inlet / outlet diameter for DHW	inch	
	Recirculation	inch	
Dimension	H x W x D	mm	1,750 x 600 x 660 (expected, subject to change in the future)
Weight	Empty	kg	113.0 (expected, subject to change in the future)
Exterior	Color / RAL code	-	White / RAL 9016

* The Combi Unit are under development, those will be launched within this year. Therefore, this specification is preliminary and it may be changed.

THERMA V™

R32 Monobloc S

Silence and Supreme

What is R32 Monobloc S

The THERMA V R32 Monobloc S is a ready-to-install, plug and play heat pump without an indoor unit. As implied by "silence" and "supreme," it boasts reduced noise level and best performance in the THERMA V R32 series. With its unique design, it requires only water piping connections, eliminating the need for additional refrigerant piping work. This not only simplifies installation but also ensures a space-efficient solution suitable for both new builds and renovations.

Product Range

Capacity (kW)	Unit		Appearance
	1 Ø	3 Ø	
5	HM051MR U44	-	
7	HM071MR U44	-	
9	HM091MR U44	HM093MR U44	
12	HM121MR U34	HM123MR U34	
14	HM141MR U34	HM143MR U34	
16	HM161MR U34	HM163MR U34	

Key Features

- Capacity range from 5 to 16 kW for new build and renovation
- R32 refrigerant with reduced Global Warming Potential (GWP)
- No need for F-gas license and simple installation due to no refrigerant piping work
- Low noise level for high installation flexibility
- Maximum flow temperature up to 65°C
- Operation range down to -25°C
- Standalone heat pump allowing easy installation

Excellent performance & efficiency

- R32 refrigerant
- R1 Compressor
- Flash gas injection
- Wide operation range
- Black Fin heat exchanger
- Solar thermal
- Energy state
- Modbus connectivity

User convenience

- Intuitive interface
- LG ThinQ
- 2nd circuit
- Various control options
- Seasonal auto mode
- 3rd party boiler
- Energy monitoring
- DHW recirculation
- Low noise mode
- Advanced pump control options
- 2 remote control

Easy installation & maintenance

- Monobloc concept
- all-in-one
- LG BECON cloud
- Clip connection

THERMA V™ R32
HIGHLIGHT OF **R32 MONOBLOC S**

Browse now

Ready-to-install and Space Saving Solution

- Integrated hydronic components in the package
- Easier and quicker installation without refrigerant piping work
- The best solution, when interior space is limited

Low Noise Level Allowing Installation Flexibility

- Designed to reach lower noise levels in order to meet homeowner expectations in urban areas
- Noise reduction technology such as encapsulated compressor and vibration-decoupling to ensure a quieter and more comfortable experience
- Quiet Mark certified*

*Certified products are HM051MR U44 / HM071MR U44 / HM091MR U44 / HM093MR U44 / HM121MR U34 / HM123MR U34. This certification is valid for UK & EU territories only.

Monobloc Concept

R32 Monobloc S is an all-in one concept, with its reduced weight allowing quicker and easier installations.

- Additional hydronic components are included in the package
- Easier and quicker installation without refrigerant piping work
- The best solution when space heating only is needed

Remarkable Heating Performance even in Cold Weather

- 100 % heating capacity at -15°C ambient temp. (@LWT 35 °C, except for 16 kW model)
- Longer continuous heating periods with reduced defrost operation time and extended intervals

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 55 ~ 80°C Operating is available only when the booster heater is operating.

	Standby power consumption	W	10		
	Recommended circuit breaker	A	40 / 16		

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 55 - 80°C Operating is available only when the booster heater is operating.

THERMA V™

R32 Hydrosplit Hydro Unit

Only Water Enters Your Home

What is R32 Hydrosplit Hydro Unit

The LG THERMA V Hydrosplit series is a simple, safe heat pump that eliminating the risk of indoor refrigerant leakage by connecting outdoor unit and indoor unit using water piping.

Since the indoor unit of R32 Hydrosplit Hydro Unit is installed on the wall rather than on the floor, space is not wasted, and the light weight enables quick installation. This makes it perfect for renovation projects. Also, it has good maintainability because the indoor unit is located indoors, for example in a machine room.

Product Range

Phase	Capacity (kW)	Indoor Unit	Outdoor Unit
1 Ø	12	HN1600MC NK1	HU121MRB U30
	14		HU141MRB U30
	16		HU161MRB U30
3 Ø	9		HU123MRB U30
	12		HU143MRB U30
	16		HU163MRB U30

Key Features

- Capacity range from 12 to 16 kW for renovation and large new build
- R32 refrigerant with reduced Global Warming Potential (GWP)
- No need for F-gas license and simple installation due to no refrigerant piping work
- Operation range down to -25°C
- Maximum flow temperature up to 65°C
- High level hydronic components integration for fast and clean installation

Excellent performance & efficiency

- R32 refrigerant
- R1 Compressor
- Flash gas injection
- Wide operation range
- Black Fin heat exchanger
- Solar thermal
- Energy state
- Modbus connectivity

User convenience

- Intuitive interface
- LG ThinQ
- 2nd circuit
- Various control options
- Seasonal auto mode
- 3rd party boiler
- Energy monitoring
- DHW recirculation
- Low noise mode
- Advanced pump control options
- 2 remote control

Easy installation & maintenance

- Hydrosplit concept
- LG BECON cloud
- Clip connection

THERMA V™ R32

HIGHLIGHT OF R32 HYDROPLIT HYDRO UNIT

Browse now

Simple Installation without Refrigerant Piping

- No need for F-gas license, because outdoor and indoor unit are connected by water pipes
- As hydronic parts are packaged inside indoor units, the installation can be realized with minimum usage of space
- Refrigerant is hermetically sealed inside outdoor unit

Remarkable Heating Performance even in Cold Weather

- Wide operation range down to -25°C
- 100 % heating capacity at -7°C ambient temp. (@ LWT 35°C)
- Reduces energy bills with the highest energy efficiency of A+++ (@ 35°C)

No Risk of Indoor Refrigerant Leakage

The Hydrosplit architecture, with no refrigerant circulating indoors, makes it possible to expand the living space, as the minimum floor area requirements do not apply.

Hydrosplit Concept

The THERMA V R32 Hydrosplit Hydro Unit connects an IDU and ODU by water pipes due to the heat exchanger's location in the outdoor unit, thus reducing the risk of indoor refrigerant leakage.

If piping length between IDU and ODU is 30 m

The IDU should be installed in a room with a floor area larger than 10 m²

1) Total Ref. Amount 2.7 kg
- Pre-Charged Ref. Amount : 2.1 kg
- Additional Ref. Charge Amount for 30 m : 0.6 kg

2) Based on 1.5 m installed height
3) IEC 60335-2-40 6 th edition applied

No minimum floor area requirement

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 55 ~ 80°C Operating is available only when the booster heater is operating.

Piping connection		Female G 1" according to ISO 228-1

* The strainer is supplied with the product, but it needs to be installed separately.

* This strainer should be installed at the inlet connection of the outdoor unit to protect the clogging of a plate heat exchanger.

No.	Part name	Description
1	Heating circuit outlet pipe	Male PT 1" according to ISO 7-1 (tapered pipe threads)
2	Heating circuit inlet pipe	Male PT 1" according to ISO 7-1 (tapered pipe threads)
3	Outlet pipe to outdoor unit	Male PT 1" according to ISO 7-1 (tapered pipe threads)
4	Inlet pipe to outdoor unit	Male PT 1" according to ISO 7-1 (tapered pipe threads)
5	Water pump	To circulate water inside the system
6	Control box	PCB and Terminal blocks
7	Pressure sensor	To measure the water pressure (0-2MPa)
8	Expansion tank	8 Liter, 3/4" connection
9	Flow sensor	To measure the water flow rate (5-80 LPM)
10	Safety valve	Open at water pressure 3 bar

THERMA V™

R32 Hydrosplit Combi Unit

Perfect Space-Saving Solution

What is R32 Hydrosplit Combi Unit

The LG THERMA V Hydrosplit series is a simple, safe heat pump that eliminating the risk of indoor refrigerant leakage by connecting outdoor unit and indoor unit using water piping. R32 Hydrosplit Combi Unit is the perfect space-saving solution for heating, cooling and hot water supply due to its fully integrated hot water tank. This all-in-one solution's hydronic and domestic hot water components are pre-wired, reducing installation time and space occupancy, making it perfect for new builds.

Product Range

Phase	Capacity (kW)	Indoor Unit	Outdoor Unit
1 Ø	12	HN1616Y NB1	HU121MRB U30
	14		HU141MRB U30
	16		HU161MRB U30
3 Ø	12		HU123MRB U30
	14		HU143MRB U30
	16		HU163MRB U30

Key Features

- Capacity range from 12 to 16 kW for renovation and large new build
- R32 refrigerant with reduced Global Warming Potential (GWP)
- No need for F-gas license and simple installation due to no refrigerant piping work
- Operation range down to -25°C
- Maximum flow temperature up to 65°C
- All-in-one Combi Unit with integrated hot water cylinder

Excellent performance & efficiency

- R1 Compressor
- R32 refrigerant
- Flash gas injection
- Wide operation range
- Black Fin heat exchanger
- Energy state
- Modbus connectivity

User convenience

- Harmonious exterior
- Intuitive interface
- LG ThinQ
- 2nd circuit
- Various pump control options
- Seasonal auto mode
- 3rd party boiler
- Low noise mode
- Advanced pump control options
- 2 remote control

Easy installation & maintenance

- Hydrosplit concept
- Water tank integration
- Clip connection

[Browse now](#)

All-in-one Integration (Combi Unit)

- Integrated indoor unit with a hot water storage tank
- Saves space in the technical room with a small footprint
- Installation time reduced with pre-installed components
- Harmonized with other household appliances for a cohesive exterior

Sophisticated and Harmonious Exterior

The indoor unit's sleek design fits into diverse indoor spaces, such as a utility or laundry room, a garage or a kitchen.

Save Space and Time

Unlike in the case of a conventional system, this all-in-one solution requires reduced installation time and saves valuable living space.

Hydrosplit Concept

The THERMA V R32 Hydrosplit Combi Unit connects an IDU and ODU by water pipes due to the heat exchanger's location in the outdoor unit, thus reducing the risk of indoor refrigerant leakage.

Key Components

Combi Unit

Components

- 1 DHW storage tank (200 l)
- 2 Main water pump
- 3 Water pump for DHW charging
- 4 Plate heat exchanger for DHW (water / DHW)
- 5 Electric heater (max. 6 kW)
- 6 3-way diverting valve
- 7 Expansion vessel for heating (12 l)
- 8 Flow sensor
- 9 Water pressure sensor
- 10 Expansion vessel for DHW (8 l, option)
- 11 Buffer tank (40 l, option)
- 12 Standard III remote controller¹⁾ (attached on the front panel)

1) Temperature control class (ERP class) : V

Connections

- A Inlet pipe from outdoor unit (female G1")
- B Outlet pipe to outdoor unit (female G1")
- C Domestic hot water outlet pipe (female G3/4")
- D Domestic cold water outlet pipe (female G3/4")
- E DHW recirculation pipe (female G3/4")
- F Heating circuit inlet pipe (female G1")
- G Heating circuit outlet pipe (female G1")

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 55 ~ 80°C Operating is available only when the booster heater is operating.

- This product contains fluorinated greenhouse gases.
- All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
- DHW 55 ~ 80°C Operating is available only when the booster heater is operating.

Accessory Parts (Optional Accessory)

Buffer tank for space heating

A standard 40 ℓ buffer tank for can be installed as an optional accessory for space heating. Fitting seamlessly into the main casing, it can be attached to the backside of the indoor unit.

Electrical specification		Unit	OSHB-40KT.AEU
Water volume		ℓ	40
Dimensions (H x W x D)		mm	560 x 518 x 175
Weight (w/o water)	Product	kg	24

* The buffer tank for space heating should be purchased and installed separately.

Expansion vessel for DHW

A standard 8 ℓ DHW expansion vessel, that conveniently fits inside the indoor unit, can be installed as an optional accessory. It is provided with an accessory kit that includes a flexible connection tube.

Electrical specification		Unit	OSHE-12KT.AEU
Water volume		ℓ	8
Connection		inch	3/4
Max. pressure		bar	10
Pre-charge		bar	3
Dimensions (H x W x D)		mm	238 x 416 x 502
Weight (w/o water)	Product	kg	2.5

* The expansion vessel for DHW should be purchased and installed separately.

Supplied Parts

Shut-off valve

Shut-off valve with strainer

Strainer

Technical specification		Details	
Material	Body	Brass	
	Mesh	Stainless steel (STS304)	
Mesh	Mesh no.	30	
	Max. particle size	0.6 mm	
Piping connection		Female G 1" according to ISO 228-1	

* The strainer and valves are supplied with the product, but it need to be installed separately.

* This strainer should be installed at the inlet connection of the outdoor unit to protect the clogging of a plate heat exchanger.

THERMA V™

R32 Split Hydro Unit

Effortless Installation, Cold-Weather Resilience

What is R32 Split Hydro Unit

The LG THERMA V Split series is a heat pump that is easy, flexible to install. As the expression "split" suggests, the outdoor and indoor units are connected by refrigerant piping, thus freezing will not compromise this unit regardless of outdoor ambient temperatures.

THERMA V Split Hydro Unit is a combination of an outdoor unit and an indoor Hydro Unit with built-in hydronic components such as a plate heat exchanger, expansion tank and water pump.

The outdoor unit is on offer in 4/6 kW and 5/7/9 kW capacity range. R32 Split 4/6 kW model is suitable for new build houses that are well insulated and require a small heating load, while R32 Split 5/7/9 kW model is adapted for both new build and renovation projects.

Product Range

Phase	Capacity (kW)	Indoor Unit	Outdoor Unit
1 Ø	4	HN0613M NK5	HU041MR U20
	6		HU061MR U20
	5	HN091MR NK5	HU051MR U44
	7		HU071MR U44
	9		HU091MR U44

Key Features

- Capacity range from 4 and 6 kW for new build and 5 to 9 kW for new build or small renovation
- R32 refrigerant with reduced Global Warming Potential (GWP)
- Maximum flow temperature up to 55°C (4/6 kW) and 65°C (5/7/9 kW)
- Operation range down to -20°C (4/6 kW) and -25°C (5/7/9 kW)
- High level hydronic components integration for fast and clean installation

Excellent performance & efficiency

- R32 refrigerant
- R1 Compressor (5/7/9kW only)
- Flash gas injection
- Wide operation range
- Black Fin heat exchanger
- Solar thermal
- Energy state
- Modbus connectivity

User convenience

- Intuitive interface
- LG ThinQ
- 2nd circuit
- Various control options
- Seasonal auto mode
- 3rd party boiler
- Energy monitoring
- DHW recirculation
- Low noise mode
- Advanced pump control options
- 2 remote control

Easy installation & maintenance

- Small refrigerant amount
- Light weight
- Flexible piping design (5/7/9kW only)
- LG BECON cloud
- Clip connection

THERMA V™ R32

HIGHLIGHT OF R32 SPLIT HYDRO UNIT

Browse now

No Potential Risk of Piping Freezing

- Robust to cold ambient thanks to refrigerant piping
- No exposed piping freezing even during prolonged blackouts

High Installation Flexibility Not Restricted by the Site Condition

- Light weight and compact size
- Allows a maximum refrigerant pipe length of 50 m and offers 3-way piping connection availability (R32 Split 5/7/9 kW Split)
- Eliminates minimum floor area requirements due to R32 refrigerant (R32 Split 4/6 kW)

Reduced Noise Level

ONLY 4/6 kW

The R32 Split outdoor unit can be installed at the minimum of 4.5 m away¹⁾ from neighboring houses while complying with noise-related requirements in most European countries, including Germany. (based on 4 kW ODU & low noise mode)

Description		Germany	Austria	Switzerland	Netherlands
Sound pressure threshold	Day time	50 dB (A) (06:00 - 22:00)	40 dB (A) (06:00 - 19:00)	40 dB (A) (07:00 - 19:00)	45 dB (A) (07:00 - 19:00)
	Evening	-	35 dB (A) (19:00 - 22:00)	-	-
	Night time	35 dB (A) (22:00 - 06:00)	30 dB (A) (22:00 - 06:00)	35 dB (A) (19:00 - 07:00)	40 dB (A) (19:00 - 07:00)

1) Minimum distance to be away from a neighboring property may vary depending on installation conditions and noise regulations in individual countries.
2) Sound pressure level is converted from sound power level of low noise mode based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2.

Small Refrigerant Amount

- free from minimum floor area requirements due to R32 refrigerant

ONLY 4/6 kW

Minimum floor space requirements do not apply to R32 Split 4/6 kW, as the maximum refrigerant amount (including 30 m pipes) used in the product is smaller than the minimum set by regulation. As a result, there are more opportunities for flexible design and installation.

Flexible Refrigerant Piping Design

ONLY 5/7/9 kW

Installation flexibility is enabled by THERMA V Split's long pipe length (up to 50 m) and the fact that the refrigerant piping can be connected in three directions: front, side and rear.

- 10 Strainer

1) Temperature control class (ERP class) : V

Connections

- A Heating circuit outlet pipe (male PT 1" *)
- B Heating circuit inlet pipe (male PT 1" *)
- C Refrigerant liquid pipe (SAE 1/4" with connector **)
- D Refrigerant gas pipe (SAE 1/2" with connector **)

* According to ISO 7-1 (tapered pipe threads)

** In case of Split 4/6 kW model, the adaptors provided with the outdoor unit must be separately installed on the gas/liquid connection of the indoor unit when connecting the refrigerant pipe. After installing the adaptors, the liquid and gas connection size becomes Ø 6.35 (1/4 inch) and Ø 12.7 (1/2 inch) respectively.

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 50 ~ 80°C Operating is available only when the booster heater is operating.

Internal

No.	Part name	Description
1	Leaving water pipe	Male PT 1" according to ISO 7-1 (tapered pipe threads)
2	Entering water pipe	Male PT 1" according to ISO 7-1 (tapered pipe threads)
3	Refrigerant pipe (liquid)	Ø 9.52 (mm)
4	Refrigerant pipe (gas)	Ø 15.88 (mm)
5	Water pump	To circulate water inside the system
6	Safety valve	Open at water pressure 3 bar
7	Control box	PCB and terminal blocks
8	Thermal switch	Cut-off power input to electric heater at 90°C
9	Flow sensor	To measure the water flow rate (5-80 LPM)
10	Plate heat exchanger	Heat exchange between refrigerant and water
11	Pressure sensor	To measure the water pressure (0-2 MPa)
12	Expansion tank	Absorbing volume change of heated water
13	Air vent	Air purging when charging water
14	Backup heater	6 kW
15	Strainer	Filtering and stacking particles inside circulating water

THERMA V™

R32 Split Combi Unit

All-in-one integration

What is R32 Split Combi Unit

The LG THERMA V R32 Split Combi Unit is a domestic hot water supply, space heating and cooling solution that conveniently combines an indoor hot water tank with a separate outdoor unit. THERMA V R32 Split Combi Unit is the perfect space-saving solution for residential applications because the Domestic Hot Water (DHW) tank, which are typically installed separately, are fully integrated along with hydronic components. The outdoor unit is on offer in 4/6 kW and 5/7/9 kW capacity range. R32 Split 4/6 kW model is suitable for new build houses that are well insulated and require a small heating load, while R32 Split 5/7/9 kW model is adapted for both new build and renovation projects.

Product Range

Phase	Capacity (kW)	Indoor Unit	Outdoor Unit
1 Ø	4	HN0613T NK0	HU041MR U20
	6		HU061MR U20
	5	HN0913T NK0	HU051MR U44
	7		HU071MR U44
	9		HU091MR U44

Key Features

- Capacity range from 4 and 6 kW for new build and 5 to 9 kW for new build or small renovation
- R32 refrigerant with reduced Global Warming Potential (GWP)
- Maximum flow temperature up to 55°C (4/6 kW) and 65°C (5/7/9 kW)
- Operation range down to -20°C (4/6 kW) and -25°C (5/7/9 kW)
- All-in-one Combi Unit with integrated hot water cylinder

Excellent performance & efficiency

- R32 refrigerant
- R1 Compressor (5/7/9kW only)
- Flash gas injection
- Wide operation range
- Black Fin heat exchanger
- Energy state
- Modbus connectivity

User convenience

- Intuitive interface
- LG ThinQ
- 2nd circuit
- Various control options
- Seasonal auto mode
- 3rd party boiler
- Energy monitoring
- DHW recirculation
- Low noise mode
- Advanced pump control options
- 2 remote control

Easy installation & maintenance

- Water tank integration
- Small refrigerant amount
- Light weight
- Flexible piping design (5/7/9kW only)
- LG BECON cloud
- Clip connection

THERMA V™ R32

HIGHLIGHT OF R32 SPLIT COMBI UNIT

Browse now

All-in-one Integration (Combi Unit)

THERMA V R32 Split Combi Unit is the perfect space-saving solution for residential application thanks to its fully integrated hot water tank. Unlike in the case of typical separate installation, in this all-in-one solution hydronic components and Domestic Hot Water (DHW) are pre-wired, which requires reduced installation time and saves valuable living space. THERMA V R32 Split Combi Unit is easy to set up and operate while it demonstrates outstanding reliability and efficiency.

Conventional

LG THERMA V R32 Split Combi Unit
(less installation space required)

Small Refrigerant Amount

- free from minimum floor area requirements due to R32 refrigerant

ONLY 4/6 kW

Minimum floor space requirements do not apply to R32 Split 4/6 kW, as the maximum refrigerant amount (including 30 m pipes) used in the product is smaller than the minimum set by regulation. As a result, there are more opportunities for flexible design and installation.

Reduced Noise Level

ONLY 4/6 kW

The R32 Split outdoor unit can be installed at the minimum of 4.5 m away¹⁾ from neighboring houses while complying with noise-related requirements in most European countries, including Germany. (based on 4 kW ODU & low noise mode)

Description		Germany	Austria	Switzerland	Netherlands
Sound pressure threshold	Day time	50 dB (A) (06:00 ~ 22:00)	40 dB (A) (06:00 ~ 19:00)	40 dB (A) (07:00 ~ 19:00)	45 dB (A) (07:00 ~ 19:00)
	Evening	-	35 dB (A) (19:00 ~ 22:00)	-	-
	Night time	35 dB (A) (22:00 ~ 06:00)	30 dB (A) (22:00 ~ 06:00)	35 dB (A) (19:00 ~ 07:00)	40 dB (A) (19:00 ~ 07:00)

1) Minimum distance to be away from a neighboring property may vary depending on installation conditions and noise regulations in individual countries.
2) Sound pressure level is converted from sound power level of low noise mode based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2.

HIGHLIGHT OF R32 SPLIT COMBI UNIT

Energy States Interlock

THERMA V R32 Split Combi Unit provides an energy state interlock function enabling customers to use their own renewable energy as much as possible. It can shift set points depending on input signal from the Energy Storage System (ESS) or any other third-party device using Modbus or Digital 230 V inputs.

- 1) Energy is generated from solar panels and sent to your battery.
- 2) When the battery is charged, the surplus energy from the ESS will heat the water in your water tank and also the surplus energy can be used to heating your room.
- 3) Surplus energy remaining even after utilized will be automatically converted to be sell to the grid.

Easy Draining System

It is convenient for maintenance or moving as the water inside can be easily drained through the built-in drain valve.

DHW Recirculation Pump Control

THERMA V can be connected to the DHW recirculation pump, which can then be managed via the scheduling function. When a user opens the faucet, hot water is immediately accessible thanks to the DHW recirculating function. This feature also has the added advantage of preventing Legionella growth in the hot water pipe.

THERMA V™ R32

R32 SPLIT COMBI UNIT (4 / 6 kW)

Outdoor unit
HU041MR U20
HU061MR U20

Indoor unit
HN0613T NK0

Key Components

Combi Unit

Components

- 1 Plate heat exchanger (ref. / water)
- 2 Strainer
- 3 Expansion tank for heating (8 ℓ)
- 4 Reserved space for DHW expansion tank
- 5 DHW storage tank (stainless steel, 200 ℓ) with internal coil type heat exchanger
- 6 Standard III remote controller¹⁾ (air temp. sensor integrated)
- 7 Air vent valve
- 8 3 Way diverting valve (DC)
- 9 Electric back-up heater (3 kW)
- 10 Water flow sensor
- 11 Main water pump with air vent and safety valve (water circuit, 3 bar)
- 12 Water pressure sensor
- 13 Drain valve for water circuit
- 14 Safety valve (DHW tank, 10 bar)
- 15 Drain valve for DHW tank

1) Temperature control class (ERP class) : V

Connections

- A DHW recirculation pipe (female G1" *)
- B Domestic hot water outlet pipe (female G1" *)
- C Domestic cold water inlet pipe (female G1" *)
- D Heating circuit inlet pipe (female G1" *)
- E Heating circuit outlet pipe (female G1" *)
- F Refrigerant liquid pipe (SAE 1/4" with connector **)
- G Refrigerant gas pipe (SAE 1/2" with connector **)

* According to ISO 228-1 (parallel pipe threads)

** In case of Split 4/6 kW model, the adaptors provided with the outdoor unit must be separately installed on the gas/liquid connection of the indoor unit when connecting the refrigerant pipe. After installing the adaptors, the liquid and gas connection size becomes Ø 6.35 (1/4 inch) and Ø 12.7 (1/2 inch) respectively.

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 50 ~ 80°C Operating is available only when the booster heater is operating.

THERMAV™ R32 SPLIT COMBI UNIT (4 / 6 kW)

Drawings

HU041MR U20 / HU061MR U20

[Unit: mm]

No.	Part name	Description
1	Air outlet	-
2	Control cover & SVC valve cover	-
3	Power and communication cable connection	-
4	Gas pipe connection	Flare joint
5	Liquid pipe connection	Flare joint
6	Handle	-
7	Intake air temperature sensor cover	-

HN0613T NK0

External

[Unit: mm]

No.	Part name	Description
1	Refrigerant gas pipe	SAE 1/2" ⁽¹⁾
2	Refrigerant liquid pipe	SAE 1/4" ⁽¹⁾
3	Heating circuit outlet pipe	Female G1" according to ISO228-1 (parallel pipe threads)
4	Heating circuit inlet pipe	
5	Domestic cold water inlet pipe	
6	Domestic cold water outlet pipe	
7	DHW re-circulation pipe	
8	Control panel	Built-in remote controller

1) When connecting the refrigerant pipe, the adaptors provided with the outdoor unit must be installed on the connection of the indoor units.

Internal

No.	Part name	Description
1	DHW tank	Domestic hot water tank (200 l)
2	Heater	Electric heater (3 kW)
3	Flow sensor	Flow metering sensor
4	3 way valve	For DHW / heating
5	Pressure sensor	Pressure sensor
6	Expansion vessel	8 l for Heating circuit
7	DHW tank sensor	Temperature sensor
8	Heat exchanger 1	Coil heat exchange (water / DHW)
9	Heat exchanger 2	Plate heat exchange (ref. / Water)
10	Water pump	Main circulation pump
11	Control box	PCB'A and terminal blocks
12	Air vent	For air purging
13	Drain cock 1	Valve for DHW tank drain
14	Drain cock 2	Valve for water circuit drain
15	Strainer	For water circuit
16	Safety valve	For DHW (10 bar)
17	Safety valve	For water circuit (3 bar)

THERMA V™ R32

R32 SPLIT COMBI UNIT (5 / 7 / 9 kW)

Outdoor unit
HU051MR U44
HU071MR U44
HU091MR U44

Indoor unit
HN0913T NK0

Key Components

Combi Unit

Components

- 1 Plate heat exchanger (ref. / water)
- 2 Strainer
- 3 Expansion tank for heating (8 ℓ)
- 4 Reserved space for DHW expansion tank
- 5 DHW storage tank (stainless steel, 200 ℓ) with internal coil type heat exchanger
- 6 Standard III remote controller¹⁾ (air temp. sensor integrated)
- 7 Air vent valve
- 8 3 Way diverting valve (DC)
- 9 Electric back-up heater (3 kW)
- 10 Water flow sensor
- 11 Main water pump with air vent and safety valve (water circuit, 3 bar)
- 12 Water pressure sensor
- 13 Drain valve for water circuit
- 14 Safety valve (DHW tank, 10 bar)
- 15 Drain valve for DHW tank

1) Temperature control class (ERP class) : V

Connections

- A DHW recirculation pipe (female G1" *)
- B Domestic hot water outlet pipe (female G1" *)
- C Domestic cold water inlet pipe (female G1" *)
- D Heating circuit inlet pipe (female G1" *)
- E Heating circuit outlet pipe (female G1" *)
- F Refrigerant liquid pipe (SAE 3/8")
- G Refrigerant gas pipe (SAE 5/8")

* According to ISO 228-1 (parallel pipe threads)

Product Specification

Efficiency Data	Unit	5 kW (1 Ø)	7 kW (1 Ø)	9 kW (1 Ø)

Air +35°C / water +7°C	Cooling capacity / EER	kW / -			

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 55 ~ 80°C Operating is available only when the booster heater is operating.

R32 SPLIT COMBI UNIT (5 / 7 / 9 kW)

Product Specification

Outdoor Units		Unit	HU051MR U44	HU071MR U44	HU091MR U44
Operation range (outdoor air temperature)	Heating & DHW (Min. ~ Max.)	°C	-25 ~ 35		
	Cooling (Min. ~ Max.)	°C	5 ~ 48		
Refrigerant	Type	-	R32		
	GWP	-	675		
	Precharged amount	g	1,500		
Piping connections (ref.)	Gas / Liquid	mm (inch)	Ø 15.88 (5/8) / Ø 9.52 (3/8)		
	Length standard / Min. / Max.	m	5 / 50		
	Level difference Max.	m	30		
	Max. length without additional charge	m	10		
	Mass of additional ref. charge	g/m	40		
Dimension	H x W x D	mm	834 x 950 x 330		
Weight	Empty	kg	60.0		
Exterior	Color / RAL code	-	Warm gray / RAL 7044		
Power supply	Voltage, phase, frequency	V, Ø, Hz	220 - 240, 1, 50		
	Standby power consumption	W	20		
	Recommended circuit breaker	A	20	25	30

External

No.	Part name	Description
1	Refrigerant gas pipe	SAE 5/8"
2	Refrigerant liquid pipe	SAE 3/8"
3	Heating circuit outlet pipe	Female G1" according to ISO228-1 (parallel pipe threads)
4	Heating circuit inlet pipe	
5	Domestic cold water inlet pipe	
6	Domestic cold water outlet pipe	
7	DHW re-circulation pipe	
8	Control panel	Built-in remote controller

Internal

No.	Part name	Description
1	DHW tank	Domestic hot water tank (200 l)
2	Heater	Electric heater (3 kW)
3	Flow sensor	Flow metering sensor
4	3 way valve	For DHW / heating
5	Pressure sensor	Pressure sensor
6	Expansion vessel	8 l for heating circuit
7	DHW tank sensor	Temperature sensor
8	Heat exchanger 1	Coil heat exchange (water / DHW)
9	Heat exchanger 2	Plate heat exchange (ref. / water)

No.	Part name	Description
10	Water pump	Main circulation pump
11	Control box	PCB/A and terminal blocks
12	Air vent	For air purging
13	Drain cock 1	Valve for DHW tank drain
14	Drain cock 2	Valve for water circuit drain
15	Strainer	For water circuit
16	Safety valve	For DHW (10 bar)
17	Safety valve	For water circuit (3 bar)

THERMA V™

R410A Split Hydro Unit

Effortless Installation, Cold-Weather Resilience

What is R410A Split Hydro Unit

The LG THERMA V Split series is a heat pump that is easy, flexible to install. As the expression "split" suggests, the outdoor and indoor units are connected by refrigerant piping, thus freezing will not compromise this unit regardless of outdoor ambient temperatures. LG's THERMA V R410A Split Hydro Unit is designed for the benefit of users and installers who want to apply a heating solution to a large capacity building or applications subject to colder climate conditions. It has a maximized energy efficiency of A++ in the mid-temperature ranges, which results in reduced operating costs.

Product Range

Phase	Capacity (kW)	Indoor Unit	Outdoor Unit
1 Ø	12	HN1616M NK5	HU121MA U33
	14		HU141MA U33
	16		HU161MA U33
3 Ø	12	HN1636M NK5	HU123MA U33
	14		HU143MA U33
	16		HU163MA U33

Key Features

- Capacity range from 12 to 16 kW for renovation
- Operation range down to -25°C
- Maximum flow temperature up to 57°C
- High level hydronic components integration for fast and clean installation

Excellent performance & efficiency

- R410A refrigerant
- R1 Compressor
- Wide operation range
- Gold Fin heat exchanger
- Solar thermal
- Energy state
- Modbus connectivity

User convenience

- Intuitive interface
- LG ThinQ
- 2nd circuit
- Various control options
- Seasonal auto mode
- 3rd party boiler
- Energy monitoring
- DHW recirculation
- Low noise mode
- Advanced pump control options
- 2 remote control

Easy installation & maintenance

- Flexible piping design
- LG BECON cloud
- Clip connection

THERMA V™ R410A
HIGHLIGHT OF R410A SPLIT HYDRO UNIT

[Browse now](#)

Flexible Refrigerant Piping Design

Installation flexibility is enabled by THERMA V Split's long pipe length (up to 50 m) and the fact that the refrigerant piping can be connected in three directions: front, side and rear.

Piping capabilities

3 way piping

• Neat & easy installation enabled by the three-way piping.

Note

1. Due to our policy of innovation, some specifications may be changed without notification.
2. Wiring cable size must comply with the applicable local and national codes. Especially the power cable and circuit breaker should be selected in accordance with that.
3. Sound power level is measured on the rated condition in accordance with ISO 9614 standard. Sound pressure level is not a value declared on Eurovent Program and is converted from sound power level based on a tonality penalty of 0 dB and installation in free-field. The directivity index (Q) is assumed as 2. Therefore, these values can be increased owing to ambient conditions during operation. Rated sound power level is in accordance with EN12102-1 under condition of EN14825.
4. Performances are in accordance with EN14511 and reflect ErP testing conditions. Above gives the declared values at rated conditions according to ErP regulation.
5. This product contains fluorinated greenhouse gases.
6. All installation sites must be equipped with an earth leakage circuit breaker (ELCB).
7. DHW 50 ~ 80°C Operating is available only when the booster heater is operating.

THERMA V™

Hot Water Heat Pump

Eco-Conscious
Hot Water
Solution

What is the Hot Water Heat Pump?

With an increasing emphasis on eco-conscious energy solutions, the Hot Water Heat Pump obtains 75% of its energy from outside air. This renewable energy source produces domestic hot water using two heat exchangers, a condenser and an evaporator.

Product Range

Phase Supply	Capacity (l)	Model	Appearance

Stylish Design

LG unit's exclusive square shape and luxury silver color make it an excellent fit for any interior design.

Differentiated design

LG's exclusive square design and sophisticated color scheme complement any interior.

iF design award 2020

Reddot design award 2020

Top Class Energy Efficiency

LG's Hot water heat pump with the highly efficient DUAL Inverter Compressor allows for impressive energy savings of over 70 % compared to a conventional electric heater.

Energy saving

Benefiting from the market's first DUAL Inverter Compressor, LG Hot water heat pump can run at low rotational speed (up to 10 Hz), reducing energy consumption by 70 % more than an electric water heater (250 l, C class).

Average estimated energy consumption savings per year

※ Simulation data on daily electricity consumption, based on EU climate conditions (average, 15°C).
 ※ The data are based on LG internal simulation.
 ※ The data are depending on the experimental conditions and is changeable according to the usage environment

Powerful Heating Performance

The DUAL Inverter Compressor maximizes the heat pump's power in turbo mode for a 30 % faster heating time for first-use water than in auto operation mode.

Fast & powerful water heating

Turbo mode can run at high speeds (up to 80 Hz) with simultaneous heating. The target water temperature in the tank will be achieved 30 % faster in turbo mode compared to Auto mode. The tank will be heated within one hour - starting with a cold tank.

Furthermore, if Turbo mode is used, the hot water can be heated to a higher temperature - leading to 25% more stored heat - compared to Auto mode.

Note: Obviously, this means increased usage of backup heater and more energy consumption, too. Thus, Turbo mode should be used only at peak load.

※ The data are based on LG internal tests and simulations.
 ※ The data depend on the experimental conditions and are changeable according to the usage environment.

Continuous operation

The two heat sources, two heaters and a heat pump complement each other perfectly. If the heat pump or one of the heaters fails, the other heat source allows alternative operation.

THERMA V™

HIGHLIGHT OF HOT WATER HEAT PUMP

Low Noise Operation

Through BLDC motor and DUAL Inverter Compressor, noise is reduced to 53 dB(A) (sound power) and provides a comfortable environment even in indoor installation scenes.

※ Sound pressure is 38 dB(A) based on LG internal test.
 ※ The data are based on LG internal test (sound power).
 ※ The data are based on LG internal tests and simulations.
 ※ The data are depending on the experimental conditions and is changeable according to the usage environment.

Various Operation Mode

LG Hot Water Heat Pump can be operated in four different modes for different conditions.

-	Schedule	Set schedule mode only in LG ThinQ application
-	Anti legionella	To select the anti legionella mode
Set	-	To set the desired water temperature
↑ ↓	18.8	To adjust the desired water temperature
Wi-Fi (3s)	Wi-Fi icon	To enable the Wi-Fi pairing
Reset Filter (3s)	Filter icon	To reset the filter alarm
°F/°C (3s)	°F / °C	To change unit between °F and °C
Water Temp (3s)	18.8	To display the current water temperature for 5 seconds

THERMA V™ HIGHLIGHT OF HOT WATER HEAT PUMP

Harmony with Various Installation Places

LG's unique design provides standalone installation and harmony in various installation places.

Garage

Laundry room

Basement

Storage room

Bathroom

Bathroom

※ This image is intended to help you understand, and there may be some differences in actual use.

Smart Control

With the LG ThinQ smartphone app, users can easily control and monitor the heat pump, checking for current water temperatures, setting operating schedules and more.

Embedded Wi-Fi

You can control the LG ThinQ app, checking information such as current water temperature, operating mode and more.

Smart diagnosis

Smart diagnosis allows users to conveniently check setup, installation, troubleshooting and other information directly from a smartphone.

Easy check & monitoring

Easily comprehensible error messages make detecting a solution and contacting the service center simple and convenient.

THEIRMA V™ HIGHLIGHT OF HOT WATER HEAT PUMP

powered by
DUAL Inverter Compressor™

LG's DUAL Inverter Compressor™ - exceptional in the market - saves energy with a wide power-saving operating range and produces efficient heating, performing quietly even in max operation mode. This technology allows the inverter compressor to achieve superior energy efficiency, cooling performance and comfort compared to compressors with on-off capabilities which is rare for monobloc heat pump water heaters.

Varied-speed dual rotary

A compressor motor has a wider energy efficient rotational frequency and a higher volumetric quick cooling capacity compared to a conventional non-inverter compressor.

Product reliability improvement

As twin rotaries balance each other while they are rotating with high speed, it reduces noise dramatically compared to a shaking single rotary compressor. The reduction in vibration reduces the possibility of fractures occurring in the surrounding pipework.

※ The data are based on LG internal test and simulation.
※ The data depend on the experimental conditions and are changeable according to the usage environment

Benefit & verification

Reliable air conditioner
The product safety is guaranteed with a 10-year warranty offered to customers.

Verification
TUV Rheinland, long term accelerated-reliability test & high marginal test

※ Long term accelerated-reliability test
LG's unique testing method with reinforced operating condition for a product life assurance to test and determine the product life cycle in a short period of time by accelerating the life cycle.
※ High marginal test
Test method to secure durability in various adverse conditions that may occur in the field by performing compressor reliability test against higher pressure and temperature than the designed range of pressure and temperature which the compressor operates in.
※ Verification obtained from TUV Rheinland for 10-year product life cycle.

Quick & Easy Installation

The machine's one-direction inlet and outlet piping and easy-to-connect wires in the junction box allow for quick and easy installation. Furthermore, the LG ThinQ app provides service alarm and self diagnosis programs for convenient maintenance.

10-year warranty

The core parts of Hot water heat pump such as water tank and compressor are certified for 10-year durability by TUV Rheinland. ceramic coating inside the water tank meets Germany ceramic standard DIN 4753 and guarantees 10 years of corrosion resistance.

※ Other parts warranty may vary according to after sales service condition

THERMA V™ HOT WATER HEAT PUMP

Technical Specification

Sales model	Unit	WH20S	
Factory model		R5TT20F-SA1	
Capacity	Volume (nominal)	ℓ	200
Energy efficiency ¹⁾	COP (7°C / 15°C)		3.30 / 3.50
Energy consumption	Annual energy consumption (7°C / 15°C)	kWh	756 / 709
Load profile			Large
Power input	Upper element wattage (230 V)	kW	2
	Lower element wattage (230 V)	kW	2
Energy efficiency class (7°C / 15°C)			A+ / A+
Power supply	V, ∅, Hz		230 / 1 / 50
Available voltage range	V		195 ~ 265
Operating mode			Turbo / Auto / Heat pump / Vacation / Anti legionella
Air flow rate	H / M	m³/min	6.7 / 4.4
	H / M	CFM	236.6 / 155.4
Sound pressure level	Auto	dB(A)+3	38
Sound power level		dB(A)	55
Dimensions	Net (H x W x D)	mm	1,625 x 580 x 582
Weight	Net	kg	100
Nominal insulation thickness	Min. / Max.	mm	40 / 80
Heat pump operation range	Min. / Max.	°C DB	-5 / 48
Exterior color / RAL code			Luxury silver / RAL 9006
Compressor	Type		Inverter twin rotary
	Warranty	Year	10
	Manufacturer		LG Electronics
	Motor output	W	510
Max. working pressure (water tank)			150 PSI (1,034 kPa)
Circuit breaker		A	15
Condensate water connection	I.D	mm	19, 12.7
V40 (Mixed water at 40°C)		ℓ	260
Refrigerant	Type		R134a
	Pre charge	kg	0.650
	GWP		1,430
	t-CO ₂ eq		0.930
Defrost method			Reverse cycle
Anode			Impressed current cathodic protection
T&P relief valve			Yes
Water connection location			side
Water connection size		inch	G ¾ M
Digital display			Yes
Wi-Fi (LG ThinQ) ²⁾			Yes
Tank warranty		Year	10

1) Water heater energy efficiency (at auto mode)
 2) ThinQ main function
 - Operation mode (auto, heatpump, turbo, vacation, schedule), temperature setting
 - Monitoring hot water temperature
 - Maintenance point alarm (filter, anode rod, etc.)
 ※ This product contains fluorinated greenhouse gases (R134a).
 ※ GWP: Global Warming Potential
 ※ t-CO₂eq: F-gas (kg)*GWP/1000
 ※ Specification, design and feature are subject to change without prior notice.

THEIRMA V™ ACCESSORIES

ACCESSORIES PROVIDED BY LG	164
LG WI-FI MODEM	168
DOMESTIC HOT WATER TANK	169
COMBINED TEST WITH DHW TANK	170

Accessories Provided by LG

Category	Model name	Model number	Figure	Applicable product	Relevant function	Purpose	Feature
Sensors	Room temperature sensor	PQRSTA0		All THERMA V products	Room temperature based control	To detect room air temperature for room temperature based control	• Max. wire length: 15 m
	Thermistor for 2 nd circuit or e/heater	PRSTAT5K10		All except for High Temperature	2 nd circuit (mixing circuit)	To detect 2 nd circuit temperature when using 2 nd circuit function	• 5 kΩ thermistor, 10 m
	Outdoor air temperature sensor	PHATSO ¹⁾		R290 Monobloc	Weather-dependent operation	To detect outdoor air temperature more accurately for weather-dependent operation especially when the outdoor unit is exposed to sunlight	• Max. wire length: 12 m • optional accessory - i.e pre-installed air sensor (mounted at grille of outdoor unit) will be used for weather-dependent operation if the outdoor air temperature sensor is not installed
	Water tank sensor	PHRSTA0 ¹⁾		All except for R32 Split Combi Unit and R32 Hydrosplit Combi Unit R290 Monobloc	Domestic hot water heating Buffer tank temperature based control	To detect DHW tank temperature To detect the temperature at the top of the buffer tank or at its outlet pipe if a big buffer tank is connected in parallel to the heat pump	• Included in DHW tank kit • Max. wire length: 12 m * A harness that can be connected to PCB-connector TB_SENSOR/BUFFER is included in this accessory produced after 1st of March 2024.
Valves	3 way valve	OSHA-3 V		All except Combi Units (incl. R290 Monobloc)	Domestic hot water heating	To divert water flow between space heating and DHW heating	• Size: DN 20 G 1" connection, male threaded
	Thermostatic mixing valve	OSHA-MV OSHA-MV1		Regardless of the model	Domestic hot water supply	To blend hot water with cold water for ensuring constant, safe shower and bath outlet temp.	• Size: 3/4" DN20 male threaded • Size: 1" DN25 male threaded
DHW tanks	Domestic hot water tank (single coil)	OSHW-200 F OSHW-300 F OSHW-500 F		All except Combi Units	Domestic hot water heating	To generate and store domestic hot water	• Storage volume: 200 ℓ, 300 ℓ, 500 ℓ • Type: internal single coil • Material: stainless steel • Capacity of booster heater: 2.4 kW
	Domestic hot water tank (double coil)	OSHW-300 FD		All except Combi Units and High Temperature model	Domestic hot water heating	To generate and store domestic hot water	• Storage volume: 300 ℓ • Type: internal double coil • Material: stainless steel • Capacity of booster heater: 2.4 kW
Installation kits	Domestic hot water tank kit	PHLTA PHLTC PHLTB		Hydro Unit for Split & Hydrosplit Old Hydro Unit for R410A Split - 3 Ø (HN1639 NK3 only)	Domestic hot water heating	To control an external DHW booster heater	• Parts included: DHW tank sensor (thermistor), circuit breaker, relay • Parts included: DHW tank sensor (thermistor), circuit breaker, relay, multi harness
	Solar thermal kit	PHLLA		R32 Split 4/6 kW Hydro Unit (HN0613M NK5), R32 Monobloc, R410A Split Hydro Unit (HN1616 NK3 / HN1639 NK3)	Solar thermal heat utilization	To operate with solar thermal system	• Length of thermistor: 12 m • Size of tube connector (W x H x D): 110 x 55 x 22

1) These accessories are under developments, those will be launched 2Q 2024.

Category	Model name	Model number	Figure	Applicable product	Relevant function	Purpose	Feature
Installation kits	Electric back-up heater	HA031M E1		R290 Monobloc Control Unit, R32 Monobloc, R32 Monobloc S	Capacity back up & emergency operation	To supplement insufficient capacity	• Heater capacity: 3 kW • Number of heating coil: 1ea (3.0 kW) • Size (W x H x D): 210 x 607 x 217 • Power: 220 - 240 V, 1 Ø
		HA061M E1					• Heater capacity: 6 kW • Number of heating coil: 2 ea (3.0 + 3.0 kW) • Size (W x H x D): 210 x 607 x 217 • Power: 220 - 240 V, 1 Ø
		HA063M E1					• Heater capacity: 6 kW • Number of heating coil: 3 ea (2.0 + 2.0 + 2.0 kW) • Size (W x H x D): 210 x 607 x 217 • Power: 380 - 415 V, 3 Ø
	HA061C E1		R32 Hydrosplit Hydro Unit (HN1600MC NK1)	Capacity back Up & emergency operation	To supplement insufficient capacity	• Heater capacity: 6 kW • Number of heating coil: 2 ea (3.0 + 3.0 kW) • Power: 220-240 V, 1 Ø	
	HA063C E1					• Heater capacity: 6 kW • Number of heating coil: 3 ea (2.0 + 2.0 + 2.0 kW) • Power: 380-415 V, 3 Ø	
Vessel	Buffer tank for space heating	OSHB-40KT		R32 Hydrosplit Combi Unit	-	To provide the buffer volume of water to the heating circuit	• Volume: 40 ℓ • Size (W x H x D): 518 x 560 x 175
	Expansion vessel for DHW	OSHE-12KT		R32 Hydrosplit Combi Unit	-	To absorb the pressure variations in the DHW tank due to changing temperatures	• Volume: 8 ℓ • Connection: 3/4" • Max. pressure: 10 bar • Size (W x H x D): 416 x 238 x 502
ETC	Extension wire for a wired remote controller	PZCWRC1		All THERMA V products	-	To extend the wire between the wired remote controller and the indoor unit	• Length: 10 m
	Extension cable for Wi-Fi modem	PWYREW000		All THERMA V products	Wi-Fi control via LG ThinQ	To extend a wire between the Wi-Fi modem and the indoor unit	• Length: 10 m
	2-remote control wire	PZCWRC2		All THERMA V products	2 remote control	To connect an additional remote controller (Slave)	• Length: 0.25 m
	Drain pan	PHDPB		R32 Split Hydro Unit (NK4 suffix), R410A Split Hydro Unit (NK3 suffix)	Cooling operation	To collect condensed water in the indoor unit during the cooling operation	-
		PHDPC					R290 Monobloc, R32 Hydrosplit, R32 Split Hydro Unit (NK5 suffix), R410A Split Hydro Unit (NK5 suffix)
Cover plate	PDC-HK10		R290 Monobloc, R32 Hydrosplit Hydro Unit, R32 Hydrosplit Combi Unit, R32 Split Hydro Unit, R32 Split Combi Unit, R410A Split Hydro Unit	-	To fill the blank space of the indoor unit front panel when the remote controller is relocated indoors.	-

¹⁾ PI485 Gateway (PP485A00T) should be installed on outdoor unit to use the central controller and cloud gateway. In the case of R290 Monobloc, PI485 G/W is built-in, so there is no need to purchase it separately.

LG Wi-Fi Modem

PWFMDD200 ENCXLEU

Access LG THERMA V anytime and from anywhere with a Wi-Fi equipped device. LG's exclusive home appliances control app (LG ThinQ) offers simple operation and various functions.

- On / Off
- Operation mode selection
- Current temperature
- Set temperature
- On / Off reservation scheduling
- Energy monitoring
- ESS monitoring
- Silent mode reservation
- Holiday mode
- Quick DHW heating

Model name	PWFMDD200
Size (mm)	46 x 68 x 14
Interfaceable products	All THERMA V line-ups
Connection type	Indoor unit 1 : 1
Communication frequency	2.4 GHz
Wireless standards	IEEE 802.11b/g/n
Mobile application	LG ThinQ (Android v7.0 (Nougat) or higher, iPhone iOS 11.0 or higher)
Optional extension cable	PWYREW000 (10 m extension)

Note

1. Functionality may be different according to each Indoor model.
2. User interface of application shall be revised for its design and contents improvement.
3. Application is optimized for smartphone use, so it may not be well functioning with tablet devices.
- For the compatibility with indoor unit, please contact regional office.
